

Mifflinburg Area School District offers a **K-12** e-learning program. When students are enrolled in our e-learning program, they are Mifflinburg students. They may participate in extracurricular activities and programs and work toward graduating with a Mifflinburg Area School District diploma.

The teachers for the program are fully certified and credentialed to provide instruction and online communication to assist students in their learning. A Mifflinburg Area School District professional staff member monitors each student's progress and regularly communicates with families.
